EXPERIENCE

- FxPro** Limassol, Cyprus
DevOps Engineer September 2025 – Present
 - **Multi-Cloud Kubernetes Orchestration:** Managed the full deployment of a corporate banking project on AWS and Azure from scratch, using Terraform, K8S, AWS RDS, and API Gateway while maintaining 99.999% service availability.
 - **AWS Infrastructure & Automation:** Primary engineer responsible for the company's AWS infrastructure, refactoring and re-architecting it with Terraform and automating the full API deployment lifecycle, eliminating manual intervention and standardizing infrastructure-as-code practices across the organization.
 - **VCS Migration:** Executed a high-impact migration of all repositories from Bitbucket to GitLab, while adjusting their CI processes, centralizing the codebase to improve security and standardizing CI/CD workflows for an entire department.
 - **Global Mobile Delivery Framework:** Developed custom deployment scripts to automate app distribution across Google Play, App Store, and RuStore
 - **Envoy Gateway Migration:** Migrated 30+ services including corporate websites from Kubernetes Ingress to Envoy Gateway across 4 clusters (2 AKS and 2 on-prem), serving 10+ millions requests per day. Separately migrated 300+ externally exposed APIs from Kong Gateway to Envoy Gateway to unify the API gateway layer and simplify traffic management.
 - **Operational Excellence & Best Practices:** Enforced rigorous industry best practices across the technology stack, including modular Terraform code, reusable Ansible playbooks, secure Jenkins pipelines, while collaborating daily with different development teams.
- Murex** Nicosia, Cyprus
DevOps Engineer June 2023 – September 2025
 - **Automation Framework Operations:** Collaborated across 3 teams to support the development, upgrades, and maintenance of an automation framework for testing, compilation, and deployment of the Murex application.
 - **Technical Support:** Resolved over 1500 technical tickets involving deployment issues, bugs and exceptions, and support tools used by 2,000+ employees, while managing infrastructure across on-premises, Azure, and AWS environments.
 - **CI/CD Innovation:** Implemented advanced CI/CD pipelines using Helm Charts, Kubernetes, Docker, Nexus, and Jenkins; incorporated security measures including artifact vulnerability scanning and access control.
 - **Automation Excellence:** Accelerated processing speeds by 15x for critical operations, reducing a task's response time from two hours to eight minutes and significantly improving productivity.
 - **Kubernetes Runtime:** Designed a runtime environment for automated tests in HA/elastic mode using Kubernetes clusters, supporting 100+ daily deployments in the Murex official test validation process on 10+ Kubernetes Clusters.
 - **Incident recovery:** Designed and implemented a self-healing and automated incident recovery system for a production environment serving 2,000+ users, enabling automatic issue detection, service restart, user notification, and system cleanup.
 - **Innovation:** Introduced ArgoCD, Python and OpenTelemetry into the team CI/CD workflows, build reusable Jenkins shared libraries, and mentored two new team members on best practices in tooling and support.
- Maids.cc** Remote to Dubai
System Analyst November 2022 – May 2023
 - **ERP System Enhancement:** Led testing and upgrades of the company Accounting and Money Collection modules to improve efficiency across the release lifecycle. Provided L1 technical support to 5 teams, supporting over 30 employees.
 - **Data Automation:** Created SQL and Python-based data validation tools used by analysts to identify production data discrepancies faster, reducing manual correction efforts by 30%.
- Asset Science** Beirut, Lebanon
Software Engineer June 2022 – November 2022
 - **Application Engineering:** Built robust desktop and web applications following an Agile development lifecycle, applying a diverse technology stack across 2 teams including React JS, Electron JS, and Java.

EDUCATION

American University of Beirut (AUB)

Bachelor of Science in Computer Science

- **Cloud & Technical Certifications:**
 - **Certified Kubernetes Administrator** by the Linux Foundation
 - **AWS Certified Developer - Associate, AWS Certified Cloud Practitioner, AWS Certified AI Practitioner.**
 - **Infrastructure and Systems Expert by AlgoExpert:** Solved 100+ infrastructure/system design problems
 - **AlgoExpert Certification:** Completed 100+ algorithmic and data structure problems

TECHNICAL SKILLS

- **Programming Languages:** Python, Go, Java, C++, C#, JavaScript, Dart, Groovy
- **DevOps & Cloud:** CI/CD (Jenkins, GitLab CI, GitHub Actions), IaC (Terraform, Ansible), Kubernetes, Docker, AWS (RDS, Aurora, EC2, S3, EKS, API Gateway, Lambda, Route53, ACM, Load Balancers, etc), Azure, Linux , Bash Scripting
- **Infrastructure & Security:** HashiCorp Vault, HAProxy, IAM, SSL/TLS, Tenable, Artifact Scanning, OpenTelemetry
- **Databases & Monitoring:** PostgreSQL, Redis, MSSQL, Oracle, Sybase, Prometheus, Grafana, ActiveMQ, Splunk
